

# Headers and Footers

---

This document demonstrates the use of custom headers and footers in `convpdf`.

## Usage

---

You can provide custom HTML templates for headers and footers using the `--header` and `--footer` flags.

```
convpdf demo.md --header header.html --footer footer.html
```

## Puppeteer Variables

---

Puppeteer allows you to use special classes in your header/footer templates:

- `.date` : Formatted print date
- `.title` : Document title
- `.url` : Document location
- `.pageNumber` : Current page number
- `.totalPages` : Total pages in the document
