

# Edge Case Testing

---

## Nested Structures

---

1. Level 1

- Nested Item
- Another Nested Item
  - 1. Deeply Nested
  - 2. Even Deeper

With a blockquote inside!  
And some `inline code`

- Back to Level 2

2. Back to Level 1

## Mixed Styling

---

This is **bold** and *italic* and ~~strikethrough~~ all at once.

How about a link inside a footnote?<sup>1</sup>

## Table with Noisy Content

---

Column 1 (with <code>code</code> )	Column 2 (bold)	Column 3
Row 1	<a href="#">Link</a>	$E = mc^2$
Row 2	 600 × 400	<del>Deleted</del>

## Empty Sections

---

(The heading above is empty)

# Escaped Content

---

# This is not a heading

\* This is not a list

[TOC] This is not a TOC (because of the backslash - wait, my renderer doesn't handle escaped [TOC] yet)

## Image with Base Path

---

---

## Footnotes

---

1. Check out [Google](#).
