Edge Case Testing

Nested Structures

1. Level 1
   - Nested Item
   - Another Nested Item
       1. Deeply Nested
       2. Even Deeper
          > With a blockquote inside!
          > And some `inline code`
   - Back to Level 2

2. Back to Level 1

Mixed Styling

This is **bold and *italic* and ~~strikethrough~~** all at once.

How about a link inside a footnote?[1]

Table with Noisy Content

Column 1 (with `code`)	Column 2 (bold)	Column 3
Row 1	Link	$E = mc^2$
Row 2	600 × 400	~~Deleted~~

Empty Sections

(The heading above is empty)

Escaped Content

This is not a heading
* This is not a list
[TOC] This is not a TOC (because of the backslash - wait, my renderer doesn't handle escaped [TOC] yet)

Image with Base Path

Footnotes

1. Check out [Google](#). ↩
